

**The content of lectures in HUMAN ANATOMY
for the students of first year, II semester, Faculty of MEDICINE nr. 1,
academic year 2025-2026**

	THEME	Friday 8⁰⁰ (Aula A) (gr. M2530)	LECTURERS
1.	Central nervous system – generalities. Functional anatomy of the spinal cord	06.02.2026	A. Bendelic
2.	Functional anatomy of the brain. Reticular formation. Limbic system	13.02.2026	T. Hacina
3.	Functional anatomy of the spinal and cranial meninges. Conducting pathways of the central nervous system	20.02.2026	A. Babuci
4.	Functional anatomy of the autonomic nervous system. Generalities. Central and peripheral levels.	27.02.2026	T. Hacina
5.	Functional anatomy of the autonomic nervous system. Sympathetic, parasympathetic and enteric nervous systems.	27.02.2026	T. Hacina
6.	Functional anatomy of the sensory systems	06.03.2026	A. Babuci
7.	Functional anatomy of the cranial nerves, I part.	13.03.2026	L. Globa
8.	Functional anatomy of the cranial nerves, II part.	13.03.2026	L. Globa
9.	Vasculature and innervation of the heart Functional anatomy of the cardiovascular system	20.03.2026	A. Bendelic
10.	Functional anatomy of the lymphoid system	27.03.2026	L. Globa
11.	Functional anatomy of the vascular system of the head and neck	03.04.2026	T. Hacina
12.	Functional anatomy and variability of the blood vessels of the limbs	10.04.2026	A. Bendelic
13.	Radiological and sectional anatomy of the trunk	24.04.2026	L. Globa
14.	Microcirculation and collateral circulation	08.05.2026	A. Babuci
15.	Peculiarities of innervation of the viscera and somatic structures	15.05.2026	T. Hacina

Head of the Department, Professor

Ilia Catereniuc
